## APPLICATION

The surfaces must be clean, dry and compact; it is preferable that at least one is porous and absorbent. Apply in dots or curbs, both in the center and at the edges of the surface to be bonded, then adhere and press evenly. It may be necessary (for uneven surfaces or too heavy loads) to use a support until completely hardened, generally 48/72 hours. Remove the glue residues with water, possibly warm.

Not suitable for direct contact with water.

## CLEANING OF EQUIPMENT AND PERSONAL PROTECTIVE MEASURES

Clean the tools used with water. Once hardened, the product can only be removed mechanically. In case of contact with the skin it is sufficient to wash with soap and water.

## PACKAGING
